

## **TASETO SILVER**

**(Groove Face Anticorrosive Agents)**

Rusting at weld groove faces is a serious hindrance not only to the rationalization and labor-saving of welding work but also to the quality control. TASETO SILVER helps suppress rusting during a period from edge preparation to completion of welding operation.

### **Features**

1. No need to remove an agent film before welding.  
(does not effect adversely).
2. The rust preventive effect is valid for 3-month outdoor exposure and 6-months indoor exposure
3. Other paints can be painted over (except for SILVER S).

### **Types and characteristics**

Types	Film color	Recomm- ended film thickness	Drying time	Features
SILVER	Silver gray	7 ~ 20 ( $\mu$ )	5 min.	Normal type for general steel good rust preventive effect. Other paints can be applied over the coat.
SILVER S	Silver gray	5 ~ 15 ( $\mu$ )	3 min.	Thick silver gray color.
SILVER A	Yellow transparent	7 ~ 20 ( $\mu$ )	5 min.	Other paints can be applied over the coat.
SILVER A2	Yellow transparent	3 ~ 10 ( $\mu$ )	3 min.	Other paints can be applied over the coat.

(Coating area : 10 ~ 20 m<sup>2</sup>/L)

## **How to use**

1. Remove oil, grease, rust and other attachments off the base metal before application.
2. Whether it is aerosol canned or brushing type SILVER, or SILVER S shake the container thoroughly until you hear the glass balls in the container rattling.
3. Coat within the thickness range of 5 to 25  $\mu$  depending on the rust prevention period or ambient conditions (within three coats by brushing or 4 layers by aerosol spraying).
4. When you use a spray gun, TASETO SILVER THINNER is recommended to clean the gun and dilute TASETO SILVER.

## **Note on usage**

1. Apply recommended film thickness.
2. For welding special shapes or applying over a special paint, it is recommended that you carry out the first piece test or consult with us.
